COSC 4332 Computer Graphics

Assignment 1: Polygons

By: Christopher McDaniel

Started: 31 January 2020

Due: 6 February 2020 11:59pm

This program will display a 1023 x 767 gray NEWT window with a special title name. The window will not be able to change sizes unless the size is changed within the code itself. The program will also display the outlines and fillings of regular polygons from a triangle all the way up to an octagon, including a circle. Each polygon will be a different color.
